Chapter I Introduction

- A. Consortium's Mission**
- B. Overview of Value Beyond Cost Savings**
- C. Applying the Book's Findings and Conclusions**
- D. Conclusions**

Chapter II Sustainable Property Investment Decisions

- A. Introduction**
- B. Level of Investment Decision**
 - 1. Strategic Decisions
 - 2. Tactical Decisions
 - 3. Property Level Decisions
- C. Organizational Context**
- D. Investor Type**
- E. Investment Type**
- F. Property Type**
- G. Geography/Other Factors**
- H. Conclusions**

Appendix II-A: Underwriting Perspective by Investor Type

Chapter III

Evaluating Property Sustainability

A. Introduction

B. What Is a Sustainable Property?

1. Financial Perspective
2. General Perspective

C. Sustainable Property Features

1. GBFC Menu of Sustainable Features
2. Sustainable Property Resources
3. Sustainable Property Features and Building Outcomes

D. Measuring a Property's Sustainability

1. Financial Analysis Requires Broad Knowledge of Alternative Approaches
2. Performance Measurement Moves to Forefront in Industry
3. Select Developments in Certification and Measurement

E. How Sustainable Property Certifications Affect Value

1. Key Findings Influencing Financial Analysis
2. Key Steps to Evaluate Environmental Sustainability Certifications
3. Key Observations About Property Sustainability Definitions Affecting Financial Analysis

F. Key Research Comparing Sustainable Rating Systems

1. Summary of Key Studies

G. Conclusions

Appendices

Appendix III-A: Sustainable Property Features List

Appendix III-B: Preliminary Analysis of Existing Case Study Databases Relevant to Green Buildings

Appendix III-C: Comprehensive Building Performance Rating Tools in North America

Appendix III-D: Measuring Sustainability: Assessment Systems/Tools

Chapter IV

Sustainable Property Performance

A. Introduction

1. Research Methodology
2. Applying Findings, Conclusions, and Methods
3. Organization

B. GBFC Sustainable Property Performance Framework

C. Process Performance

1. Integrated Design
2. Contracts/Legal
3. Service Provider Quality and Capacity
4. Energy Use Forecasting
5. Regulations and Code Compliance
6. Commissioning
7. Measurement Verification

D. Feature Performance

1. Feature-Based Financial Performance
2. Performances and Risk Assessment of Six Key Features/Systems

E. Building Performance

1. Development (“First”) Costs
2. Whole Building Performance Studies
3. Building Energy Use
4. Occupant Performance

F. Market Performance

1. Introduction
2. Three Principles for Applying Sustainable Property Market Performance Research
3. Presentation of Market Performance Evidence

G. Financial Performance

H. Conclusions

Appendices

- Appendix IV-A: GBFC Sustainable Property Performance Framework
- Appendix IV-B: RICS Green Value Interview Summaries
- Appendix IV-C: Studies of Productivity and Health Cited by Industry
- Appendix IV-D: Additional Studies of Productivity and Health

Chapter V

Sustainable Property Financial Analysis

A. Introduction

1. Chapter V Outline: Six Steps to Sustainable Property Financial Analysis
2. Applying Findings, Conclusions, and Methods

B. Summary Conclusions

C. Step 1: Select Financial Model

1. Investment Context
2. Sustainable Property Financial Analysis Alternatives

D. Step 2: Evaluate Property Sustainability

1. What Is a Sustainable Property?
2. Financial Analysis, Value and Sustainable Property Certifications

E. Step 3: Assess Costs/Benefits of Sustainability

1. Understanding the Role of Cost-Benefit Analysis
2. Linking Sustainable Features/Outcomes and Costs-Benefits
3. Sustainable Property Risk Mitigation
4. Applying GBFC's Sustainable Property Cost-Benefit Checklist

F. Step 4: Evaluate Financial Implications of Costs/Benefits

1. Linking Costs and Benefits to Financial Performance
2. The Evaluation Process
3. Assessing the "Net Impact" of Sustainable Costs and Benefits

G. Step 4: Determine Financial Model Inputs

1. The Discounted Cash Flow Model
2. Discounted Cash Flow Model Inputs
3. The Process for Determining Financial Model Inputs
4. A Comment On Quantitative and Qualitative Data and Analysis

H. Step 6: Risk Analysis and Presentation (RAP)

1. Property Risk Focus
2. Why RAP is Key to the Future of Sustainable Property Investment
3. How to RAP
4. Background on Cash Flow and Building Ownership Risks

I. Valuing Sustainable Properties

1. Sustainable Properties Should be More Valuable
2. Valuers Must Prove Value of Sustainability One Property at a Time
3. Value is Not Just About Formal Reports
4. Valuers Have Skills to Make Significant Contributions to Sustainability
5. Fundamental Valuation Methodologies Do Not Need to Change
6. Sustainable Valuation Must Look Beyond Costs
7. Public Value Has Increasing Importance to Private Value

8. The Income Approach is Critical to Understanding Sustainable Value
9. Valuers Need to Get Better at Integrating Risk Analysis into Value
10. Performance Measurement key to Improving Sustainable Valuation
11. Energy is a More Critical Valuation Issue for Sustainable Properties

J. Conclusions

Appendices

- Appendix V-A: Financial Analysis Alternatives
- Appendix V-B: GBFC Sustainable Property Performance Framework
- Appendix V-C: GBFC Sustainable Property Cost-Benefit Checklist
- Appendix V-D: Discounted Cash Flow Model Inputs

Chapter VI

Sustainable Property Underwriting Guidelines

A. Introduction

B. Underwriting Perspectives by Investor Type

C. Key Differences in Sustainable Property Underwriting

1. Broad Range of Investment Decisions
2. New Mix and Priority of Service Providers
3. Modified List of Costs and Benefits (Risks)
4. Priority of Energy/Carbon Reduction Investment
5. Importance of Process and Feature Underwriting
6. Priority of Government Regulations and Incentives
7. Underwriting Health and Productivity Benefits
8. New Sustainable “Sub-Financial” Analysis

D. Underwriting Service Providers

1. Introduction
2. The Sustainable Services Markets
3. Service Provider Risks
4. Service Provider Underwriting Best Practices

E. Underwriting Energy-Carbon Reduction Investment

1. Introduction
2. Introduction to Energy Performance Measurement
3. The Importance of Energy Prices
4. Sustainable Property Energy/Carbon Reduction Features/Strategies
5. Sustainable Property Energy Features and Building Outcomes
6. Feature/Strategy Based Financial Analysis Tools
7. Underwriting Process for Energy/Carbon Reduction Investment

8. The Evidence of Building Energy Performance
9. The Impact of ESCOs on Underwriting Energy/Carbon Reduction Investment

F. Underwriting Space User Demand

1. Segmentation Analysis of the Space User Market
2. Space User Demand Risks
3. The Evidence of Space User Demand

G. Existing Building Underwriting Guidelines

1. Preliminary Compliance with Investment Guidelines
2. Owner/Operator
3. Property Management
4. Property Characteristics
5. Property Operations/Cash Flow
6. Insurance
7. Third-Party Reports

H. New/Retrofit Building Underwriting Guidelines

1. Preliminary Compliance with Investment Guidelines
2. Owner/Developer
3. Construction Risk
4. Carry Risk
5. Take-Out Risk
6. Third-Party Reports

I. Conclusions

Appendices

Appendix VI-A: Space User Underwriting Checklist

Appendix VI-B: Existing Building Underwriting Checklist

Appendix VI-C: New/Retrofits Building Underwriting Checklist
